

Investment Facilitation Service | Participate Sustainability

Consultation has concluded

We are here to help you invest in waste and resource recovery infrastructure that increases resource recovery in Victoria.

We can help you by:

- providing data and information on waste and resource streams
- providing advice for business case development, approval processes, and site planning
- identifying potential financial and non-financial support mechanisms across government
- coordinating your relationship with government and facilitating introductions with interested parties across industry, government, regulators and the community
- providing insight on the status and development of local end markets
- informing you of environmental issues and requirements
- advising on engaging with local communities
- helping you understand the Victorian Government's policy direction and its priorities.
