

Construction & Demolition Publications & Resources

June 2001

FOR DEVELOPERS, ARCHITECTS AND SPECIFIERS

Designing IN Waste Minimisation - provides building designers with design-based waste management strategies and assists in better understanding the environmental and cost implications of waste.

Web address: www.ecorecycle.vic.gov.au

RAIA Environment Design Guide - comprehensive single source of information on environmental issues, specifically tailored to the needs of Australian building design professionals. A sample case study can be viewed at www.ecorecycle.vic.gov.au For more details visit www.raia.com.au/edg

EcoSpecifier - Handbook and web site featuring environmentally improved materials (EIM) that are commercially available in Australia and are specified by architects, builders, building designers, interior designers, furniture designers and manufacturers.

Web address: ecospecifier.rmit.edu.au

FOR DEVELOPERS AND LOCAL GOVERNMENT

Model Contract Clauses - These clauses have been designed to be readily inserted into any formal agreement between contractors who will be made responsible for developing a waste minimisation plan for a construction and/or demolition project.

Web address: www.ecorecycle.vic.gov.au

FOR BUILDERS

OnSite - A worldwide web site with authoritative information on waste avoidance and resource recovery in the construction and demolition industries. The site includes an online forum and several relevant case studies.

Web address: onsite.rmit.edu.au

Resource Efficient Builder Information sheets - a series of sheets that provide information and guidance to builders on reducing construction and demolition waste. The series covers waste minimisation strategies and case studies.

Web address: onsite.rmit.edu.au (see 'Projects' section under 'Information Resources')

Case Studies are available from the publications section : www.ecorecycle.vic.gov.au

Major Projects and Commercial & Residential Developments

VicRoads
Boulderstone Hornibrook (Western Link)
Delfin Property Group (Late 2001)

Building Projects

Delfin Property Group (Late 2001)
Seidler Homes (Late 2001)

Demolition Projects

Lightning Property Services
Essendon Demolitions (Late 2001)
Red Cliffs Power Station (Late 2001)
Monash Swimming Pool (Late 2001)

Construction & Demolition Publications & Resources

OTHER RESOURCES

Waste Wise Business Program - this program is designed to encourage businesses to reap the benefits of waste minimisation. For details on this program visit the 'Waste Wise Businesses' section on the EcoRecycle web site: www.ecorecycle.vic.gov.au

Minimising Construction Waste - a report detailing waste reduction strategies for the design and procurement process of building projects.

Web address: www.ecorecycle.vic.gov.au

Building Construction Waste Minimisation and Recycling Project - Report outlining the results gained by Fletcher Construction Australia in trialing a waste minimisation program in the construction of the Dandenong Police and Court Complex.

Web address: www.ecorecycle.vic.gov.au

BUILDING PRODUCTS

Guide for the Specification of Recycled Concrete Aggregates (RCA) for Concrete Production - presents draft guidelines for specifying commercially produced recycled concrete aggregate (RCA) for pre-mix concrete production based on product variability trials conducted by CSIRO.

Web address: www.ecorecycle.vic.gov.au

Investigation into the Use of Recycled Crushed Concrete for Road Base Use - Report covering the investigation of fundamental properties of recycled crushed concrete stabilised with a range of cementitious binders.

Web address: www.ecorecycle.vic.gov.au

Crumb Rubber Asphalt Fatigue Study Phase 1: Binder Testing - Research to establish the performance characteristics of asphalt made with old tyre rubber.

Web address: www.ecorecycle.vic.gov.au

Crumb Rubber Asphalt Fatigue Study Phase 2: Asphalt Testing - Research to establish the performance characteristics of asphalt made with old tyre rubber.

Web address: www.ecorecycle.vic.gov.au
