

AUSTRALIAN BIOMASS FOR BIOENERGY ASSESSMENT (ABBA)

VICTORIAN SECTOR PROFILES

The following sector profiles (by Waste Resource Recovery Group (WRRG) region) have been generated from Victorian biomass data estimated as part of the national ABBA project to inform discussions around bioenergy opportunities.

Victorian data, including modelling assumptions applied to estimate potentially available biomass (tonnes per annum), is available via the Australian Renewable Energy Mapping Infrastructure (AREMI) – <https://nationalmap.gov.au/renewables/>
